b. Cardiac Arrest Due to (or as a consequence of):

c. Possible COVID-19 Due to (or as a consequence of):

d.

Current Case Definition:	New Case Definition:
The example death certificate above is NOT sufficient it has to be accompanied with a positive PCR result to be counted as a COVID-19 related death.	The example death certificate above is sufficient and will be counted as COVID-19 related death . Positive PCR results are no longer required.

The number of COVID-19 related deaths is going to increase because of the new case definition.

Collin County Judge, Chris Hill, understands it real well and says the standard for proving Covid-19 is remarkably lower now. Hear him at 25:23 on the video link at top of page 2.

Tyranny is greater threat than Covid-19!

credit system that will also be implanted in every citizen. Everyone will have credit to get the things they need as long as they are not a threat to society.

But natural man created in the image of God living naturally in the world that God created for him is made a threat to society. Only those who are altered by vaccines, chips and implants will be safe and worthy of credit.

Mandatory vaccination is an admission that they don't work. If they did work, those who took them would be safe no matter how many others took them. No one has authority on earth to demand that a virus be eradicated by forcing everyone to take a vaccine. Regardless of all the CDC propaganda about how great vaccines are

Don't get tested if you want to open Texas!

they can cause severe problems and even death.

The entire population, 1,035,000, of Collin County has Covid-19 by the new standard. This is outrageous fraud! This is Medical 9/11 Demolition of the nation used to coerce citizens into doing things they would not do by free choice.

We see what happened when we trusted the experts on 9/11/01 then 20 years later we learn the buildings were brought down with controlled demolition rather than jet airliners.

And now we are going to trust the experts about a fake pandemic and we are supposed to submit our bodies for them to vaccinate, chip and implant. No sir, Government and Medical Tyranny is a much greater threat to society than the "Novel Covid-19 Virus."

Why does Government Create & Maintain a Fake Covid-19 Pandemic?

We present evidence in this brochure that proves the Texas Department of State Health Services has been wildly exaggerating the number of cases of Covid-19.

First it is bad enough that the tests they use cannot prove the "novel coronavirus Covid-19." The RT PCR¹ test was developed in 3 weeks and is suspect and IgG and IgM tests² only show the presence of an infection from bacteria, allergy or virus and not Covid-19 precisely.

But the next part is much worse. Those who test positive for an infection of some kind are labeled "confirmed" with Covid-19. Then those confirmed cases are asked who they have been in contact with for the last 14 days and all of those people are deemed "probable cases." But all those administering these tests are required to report both the confirmed and probable cases as total cases.

1 Reverse Transcription Polymerase chain reaction (PCR) replicates DNA and can return false positives and false negatives.

So the number of cases you hear reported to you by the mass media cartel every night are overflowing with probable cases rather than real confirmed cases. This is rightfully called **fraud**. You can divide those numbers by 20 or 100 or more to arrive at how many people might have Covid-19.

We can get caught up in the "science" of virology, epidemiology, immunology and testing and yield to the experts but we can also see parts of this "pandemic" that reveal the whole nature of it to reveal its real strength and purpose.

Inflating the cases: It is a fact that when the outbreak first started the numbers for seasonal flu and pneumonia went down while the numbers for Covid-19 went up. When new cases dropped off we were allowed to start opening and then they changed how they count the cases which causes a spike in the numbers used to keep us closed down.

The Texas Department of State HS lies to you every night!

Current Case Definition

- Confirmed case of COVID-19
 - Positive PCR lab result for COVID-19

New Case Definition

- Confirmed case definition
 - No change in case definition
 - Need a positive PCR lab result for COVID-19
- NEW** Probable case definition:
 - FDA approved positive lab with or without symptoms
 - Close contact with confirmed or probable cases
- NEW** Case definition for deaths related to COVID-19
 - COVID-19 is listed on the death certificate as a cause of death
 - PCR positive lab result for COVID-19 is no longer required

Mandatory mask decree: The three mandatory masks specified are useless against the spread of a virus that cannot be seen without an electron microscope. And the masks are dangerous to those who wear them and can in fact make you more inclined to develop Covid-19 symptoms.³

Lockdown healthy society: Just how does shutting down all of society help people stay healthy? This prevents herd immunity and

Increases stress over survival without income.

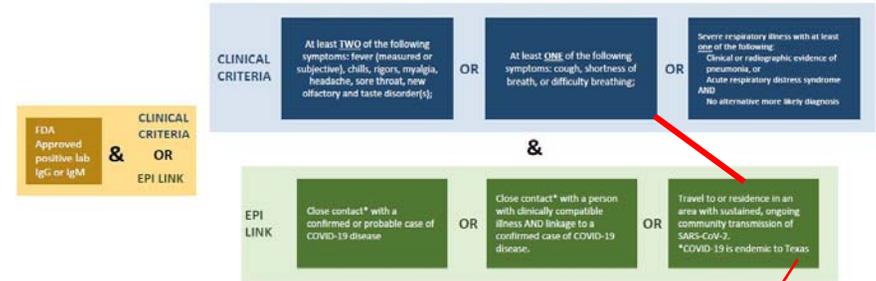

Lockdown until Vaccine: They prevent natural herd immunity while demanding vaccine for all? That's contradictory as a vaccine could be considered a controlled imposed herd immunity.

Data Chip Implant: The vaccine is a series of injections that will require a data chip to keep track of what the patient has received and when.

NEW Probable Case Definition

- A probable case of COVID-19
 - FDA approved testing (IgG and IgM) and Clinical Criteria or Epi Link
 - Clinical Criteria and Epi Link

Meaning a case is classified as probable if an individual can fit into:

- YELLOW box AND BLUE box (without GREEN box)
- OR
- YELLOW box AND GREEN box (without BLUE box)
- OR
- BLUE box AND GREEN box (without YELLOW box)*

*Contact has to be within 14 days of symptom onset.

A cough in Texas is Covid-19

****There are 15 different options for a person to be classified as a probable case****

The chart above shows how one becomes a counted probable case. The blue boxes contain various symptoms of just about anything. The green boxes contain various degrees of contact with another probable case or confirmed case to even living in the same town as either one of those. The yellow box is those showing positive antibody tests (IgG, IgM) which do not prove Covid-19 but when linked to one EPI green box or one blue symptom box results in probable.

If you cough in Texas you are a Covid-19 case.

Collapse of monetary system: They are already blaming everything on this Covid-19 Pandemic as if a flu closed our nation down instead of government decrees. The Federal Reserve has loaned the government trillions to stay afloat during an unnecessary shutdown and that will surely lead to the banking cartel to demand we go to a digital compliance based
